## Data Analyst

Fresh Computer Science graduate with hands-on experience in **data analysis, visualization, machine learning**, and **database management**. Proficient in Python, **SQL, Excel, Power BI, Pandas, NumPy**, and **Matplotlib**, with experience transforming data into actionable insights through real-world projects.

## Technical Skills

| | | |
|---|---|---|
| **Languages** | : | Python, C/C++, JAVA, CSS, HTML, SQL, Flutter |
| **Libraries** | : | Pandas, Matplotlib, Scikit-learn, NumPy |
| **Databases** | : | SQLite, PostgreSQL |
| **Dev Tools** | : | Microsoft Excel, Power BI, Visual Studio Code, Git |

## Education

**Superior University** — Faisalabad, Punjab, Pakistan
*Bachelor of Science in Computer Science* — *Oct 2023 – Present*

**Superior College** — Faisalabad, Punjab, Pakistan
*FSc Pre-Medical* — *May 2020 – Oct 2022*

## Projects

**FieldGuard: An AI-Powered Weed Detection and Analytics Platform** *Flutter, MySQL, YOLOv26, PyTorch*

- Collected and curated a dataset from corn fields, and annotated plants using **RoboFlow**
- Fine-tuned a **YOLOv26** object detection model, **achieving 92% detection accuracy** on the testing set
- Deployed the finetuned model through RoboFlow and integrated it into a **Flutter-based Android application** for field scanning and weed detection
- Implemented analytics features to **generate weed spatial distribution maps**, store scan history, and manage farm records using **Firebase Real-time Database**
- Enabled farmers to monitor weed infestation patterns, maintain historical field data, and support data-driven crop management decisions

**Stockpile Web: AI-Powered Inventory Management System** *LLM, GroqAPI, FastAPI, SQLite, Bootstrap*

- Developed a full-stack inventory management system using FastAPI, SQLite, and Bootstrap for centralized stock monitoring and operations management
- Implemented modules for products, orders, purchases, suppliers, and user management with **secure authentication**
- Built interactive dashboards with real-time inventory analytics, stock-level monitoring, alerts, and data visualizations using charts and reports
- Designed RESTful APIs and custom SQL query endpoints to support dynamic data retrieval, reporting, and inventory insights
- Integrated an **AI-powered chatbot** using the **Groq API (Llama 3.1 8B)** to assist users with inventory queries, stock information, and operational support

## Certifications

- Specialization: Microsoft Data Analysis with SQL, Excel & Power BI
- Google Certified: Google Data Analytics

## Awards & Achievements

- Chief Minister Honhaar Scholarship Program Awardee, *Awarded by Govt of Punjab*
